

Examples of different product types

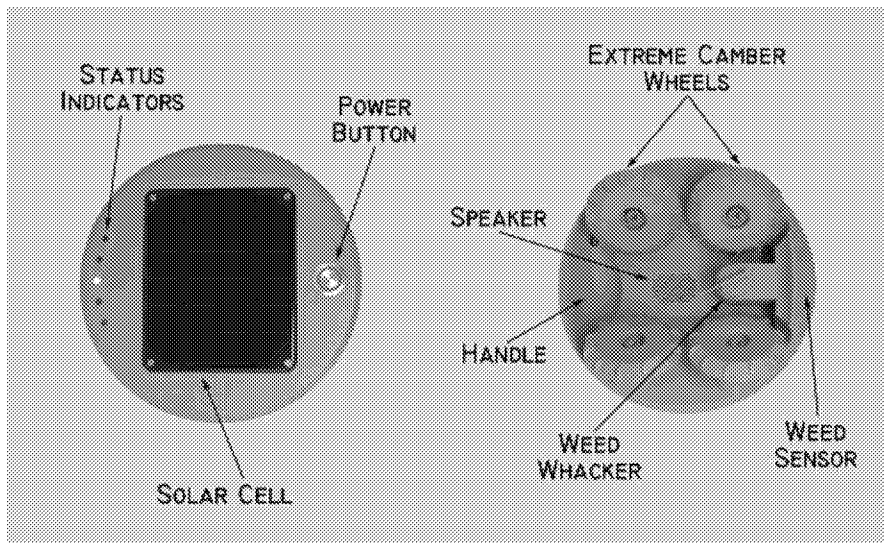

Engineered Water Nanostructures (EWNS)

This device consists of an apparatus that supercharges the water particles with 10 to 22 electrons per particle. These electrons help break down cell structures, giving the engineered water antimicrobial properties.

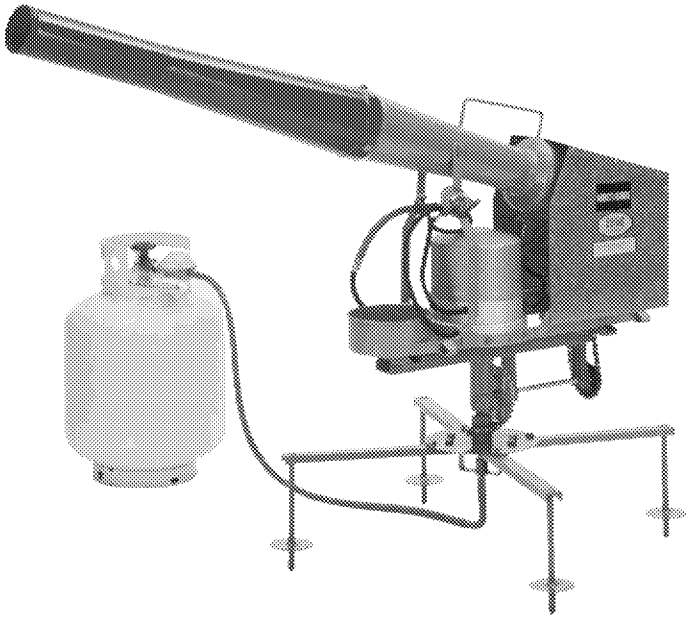

The Rodenator 2000

This device is used to remove problematic rodents. A mixture of oxygen and propane is released into the ground, which ignites and collapses underground burrows and tunnels. This product is regulated as a device.

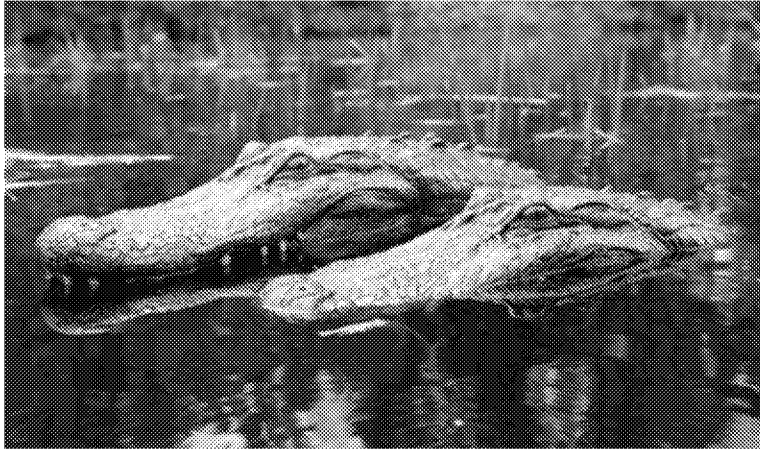

Tertill

Tertill is a solar-powered, Roomba-like apparatus meant for the outdoors with the ability to cut grass and whack weeds. This product is being developed through Kickstarter and is not currently on the market.; however, if you make a \$500 donation they will send you a prototype.

Carbide Cannons

This is the M8 Multiple Detonation Cannon. For about 25 seconds, it fires at irregular intervals about three times, then for one minute detonates four times. It administers a 130 dB thunderclap, and is marketed to “repel nuisance birds and wildlife” with the emitted sound.

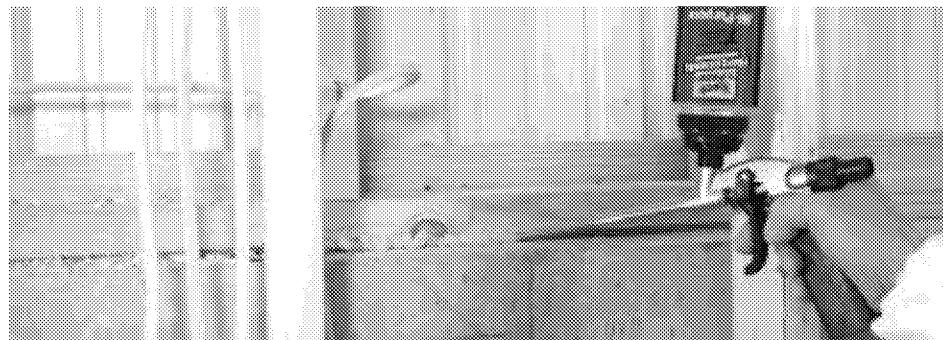

Decoys

These decoys are marketed to mitigate pests such as geese and ducks.

Five Fruit Fly Traps
with Free Bait Activator
Good for 5-7 Weeks

With **eek-o**, your fruit, and our non-toxic food-safe bait activator powder, let us help to keep your home fruit fly and poison free.

Touch 'n Foam Mouse Shield

The flatworm exit is effective in removing flatworms

Flatworms can be toxic to reef life if they are allowed to flourish in an aquarium. Once established, they can reproduce quickly and will hide in any crack or crevice that they can find. In order to make sure the solution can work effectively use a power head or other device to flush them out of the hiding places, after which it is recommended to siphon out as many as possible. Flatworm Exit is harmless to all reef organisms...

Arctick For Pets- Freeze and Kill Ticks (1.25 oz)
